What Is the **Mission** of LayDeez NFT?

For every LayDeez NFT that is purchased, you are helping bring more inclusion into the Web 3 space as well as helping women affected by cancer.

***\$100,000** ,raised for our partner charity F Cancer.
Have fun, make an impact. This is who we are.*

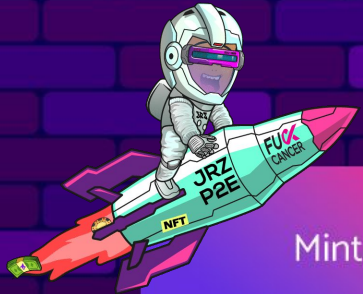

Check out our LayDeez NFT PFP's

LayDeez is a collection of **5,555** unique profile pictures which will mint for .069 ETH each. Each mint comes with a 2D and 3D PFP. LayDeez allows breeding within the Deez ecosystem as well as with a few other select NFT collections. The offspring of LayDeez are called JR'Z.

LayDeez NFT's are Meta Ready at Mint

Every LayDeez NFT comes with a 2D PFP as well as a matching 3D PFP. Upon initial mint, your unique Laydeez will be revealed. Shortly after, we will be dropping the matching 3D PFPs for all holders at no cost. We will also be adding a download where all holders can access meta ready models of their PFP. This will allow you to take your models to tons of different metaverse locations. LayDeez are a true Meta Ready NFT Project.

Create your Own Customized LayDeez

LayDeez NFTs can be staked on our website to earn you daily utility tokens. These tokens can be used to buy items in our Deez Shop. Such examples are; animated backgrounds, new traits, music, raffles, WL spots for select projects, and even NFTs to name just a few of the things the Utility Tokens can be used for. Fully customize your PFP just the way you like it and make onchain changes. Or, buy items with your token and sell them on the marketplace for ETH.

LayDeez NFT's are **Breeding** Capable

NFT Breeding is the process of staking your **Laydeez** while holding another NFT project. This will trigger Laydeez utility function and create a JR'Z NFT. This is a free NFT you can create just by staking a Laydeez and a partnering NFT project in a love shack. A full list of breedable collab partners will be announced in an updated White Paper.

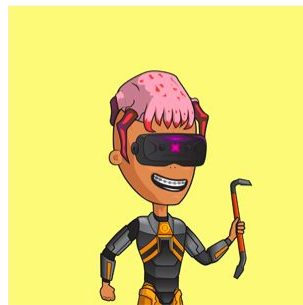

Deez NFT Breeding Example

EXAMPLE BREEDING PROCESS:

- ★ You hold a Laydeez NFT and an approved breeding partner, Deez Nuts NFT.
- ★ You head over to the Laydeez website and stake your Laydeez in the Love Shack. Make sure your wallet has both the Laydeez and breeding partner, in this case Deez Nuts.
- ★ Your Laydeez will need to be staked in the loveshack for a specified amount of time and then you will receive a free JR'Z NFT.
- ★ The JR'Z will have a unique look depending on the Laydeez and breeding partner you select. Every combination will be different.
- ★ The free JR'Z NFT can be sold on the marketplace for ETH or kept and enjoyed.
- ★ All JR'Z NFTs will give you access to the P2E game where you can win up to \$250/day.

Learn About How to Create a JR'Z

JR'Z are an adolescent, PFP collection of no good, game loving, trouble makers! JR'Z all look different and have different traits depending on the breeding partner you mixed with your Laydeez. An official announcement of breeding partners will be announced soon. Below are a few examples.

JR'Z NFTs Have P2E Game Capabilities

All holders of JR'Z will have access to our P2E game. Every single day, the competition will reset and a new game will begin. The high scores for that day will win real money! Every single day the competition resets and a new game is present for you to play. Certain JR'Z will have different advantages based off a variety of things like breeding partner, rarity, and more.

The games vary in skill and are simple enough that anyone can pick them up and play. Grinding won't be allowed and everyone will have a similar amount of time they are allowed to play each day to keep things fair. The games are very casual and fun! The best part is that you can win money! Get JR'Z. Play to win! Win to earn!

Thank You

SEE YOU SOON!
